

August 2020 – February 2024

further progress made towards the creation of Helena Aurora
National Park

In November 2023

***** Mt Manning Conservation Park, which includes Helena
and Aurora Range (Bungalbin) and Mount Manning Range,
Was Upgraded to Class A National Park *****

This occurred via the WA government's Reserves Bill 2023, which passed successfully through both the Legislative Assembly and Legislative council in November 2023.

This is part of Stage 2 in the creation of Helena Aurora National
Park.

**The final part of Stage 2 to create Helena and Aurora National Park
is the negotiation and signing of an Indigenous Land Use
Agreement (ILUA) between the Traditional Owners and State
government.**

*Note: The Helena Aurora National Park is a combination of the Mount
Manning Range Nature Reserve (created in 1979 and upgraded to Class A
national park in February 2021 = Stage 1) and the Mt Manning Conservation
Park (created in 2005 and upgrade to Class A national park in November 2023
= part of Stage 2).*

*Mt Manning Conservation Park (Reserve 48470) consists of two distinct areas:
Helena and Aurora Range Conservation Park and Mount Manning Range
Conservation Park.*
